SOFTWARE ENGINEERING INTERN

Driven and fast-learning Computer Science student with strong programming, problem-solving, and customer service skills. Demonstrates adaptability, reliability, and the ability to thrive in both independent and collaborative work environments. Known for a strong work ethic and dedication, evidenced by a promotion to a supervisory position within one year of employment.

PROFESIONAL SKILLS

Programming: C++, C#, Java, SQL, HTML, CSS, Python, Visual Studio, .NET Framework, Bash Scripting, PowerShell Scripting.

Additional Skills: Client Support/Customer Service, Device Encryption, Task Sequence Creation and Deployment, Computer wiping/reimaging, Asset works, Surplus and reimaging.

Projects: Built a Learning Management System for CS 3750 and a Research, Scholarship, and Professional Growth System for Capstone CS 4760 both using .Net Razor Pages Framework with HTML, C#, and CSS.

WORK EXPERIENCE

- Weber State event coverage and setup help where we worked with event coordinators to set up presentations, zoom meetings, and microphones.
- Set up and fixed basic classroom AV, on call for any instructor or student that needed classroom tech help or help with devices.
- CTS Software and System Support Team from July 2023 – July 2024. This team helped with software testing, and different campus wide projects.
- Led the Davis team in device encryption where we encrypted all Davis campus computers which included around 800 devices.
